

## Moon of Hyldemoer Winter Herbal Share 2025/26

As the coldest & darkest of nights are upon us, the winds searing through the obscurity, as we more thoroughly call upon warmth & community, and tend to the quiet murmurings of seeds under soil, under blankets of snow, it is once again time to offer the **Moon of Hyldemoer Winter Herbal Share**, a share of the plant medicine harvest, gathered & co-created with great love, intention & gratitude during this past season of warmth, drought, *some* rain & Earthen generosity.

As an herbalist of the Wild Heart Tradition, I focus on nourishing herbs for an ever-dynamic conversation with all of life. For over two decades, I've been residing along, tending & working with Plants, co-creating medicines with them, forming an ever-growing apothecary. The Plants, Trees, Soil, Sun, Rain, Wind have been the greatest teachers along this continued path of learning. As well, I pay homage to many human teachers who have taught me so much from their deep relation with the plant world.

This **Winter Herbal Share** comes from a devotion to being a part of the spiralic cycles of life, to the spirits of the land & to the Plant beings. As an avid gardener, I grow many of my own herbs and harvest thoughtfully & intentionally with the land I reside with. This offering is based on the CSA (Community Supported Agriculture) model in which members support the grower by purchasing a share of the harvest, often meeting new ways of being with the plants along the way.

The **Moon of Hyldemoer Winter 2025/26 Herbal Share** focuses on nurturing during the cold, dark times, allowing for rest when able, even for a moment of closing one's eyes, slowness, awe, for dreaming into potentiality & delving into the unknown with trusted allies.
